NUCE LIVE and LEARNING ON DEMAND TRAINING

LIVE Safety Training

We are offering the majority of the NJCE JIF training catalog on a Virtual platform through Zoom. In-Person training will be held via the MSI-NJCE Expos and are scheduled throughout New Jersey in 2025 - 2025 Expo Training Schedule Flyer (attached)

Virtual classes feature real-time, instructor-led in-person, and virtual classes. Experienced instructors provide an interactive experience for the attendee on a broad spectrum of safety and risk control topics. Most NJCE LIVE virtual offerings have been awarded continuing education credits for municipal designations and certifications.

The live virtual monthly training schedules and registration links are available on the NJCE.org website under the "Safety" tab: NJCE Live Monthly Training Schedules. Please register early, under-attended classes will be canceled. (October through November 2025 Live Training Schedules and Registration Links are attached).

To maintain the integrity of the NJCE classes and our ability to offer CEUs, we must abide by the rules of the State agency that issued the designation. Most important among those rules is the attendee of the class must attend the whole session. Attendees who enter the class more than 5 minutes late or leave early will not be awarded CEUs for the class or receive a certificate of completion.

ZOOM SAFETY TRAINING GUIDELINES

Attendees who enter the class more than 5 minutes late or leave early will not be awarded CEUs for the class or receive a certificate of completion. To maintain the integrity of the classes and our ability to offer CEUs, we must abide by the rules of the State agency who issued the designation. Chief among those rules is the attendee of the class must attend the whole session. This guideline also applies to any participant taking the class as part of the NJCE Leadership Academy Program. The Leadership participant must be in attendance for the entire class runtime (no exceptions) in order to receive credit for the class.

The Zoom platform is utilized to track the time each attendee logs in and logs out of webinars. Also, we can track participation, to demonstrate to the State agency that the student also participated in polls, quizzes, and question & answer activities during the live, instructor-led webinar. We maintain these records to document our compliance with the State agency.

Zoom Training Registration:

- When registering, please indicate the number of students that will be attending with you if in a group setting for an

III.

She spoke about the safety training available to the committee members, many which were found on the www.njce.org website. She instructed the way she would like the training calendars to be distributed by each County department. She encouraged all training but focused on speaking about Haz-Com training. She advised when it is required by law for the training to be completed. Ms. Sauro inquired about when the CATS drivers should be taking the Personal Protection Equipment Training, as there was a concern about the need for drivers to take the training. Mr. Prince advised that a job hazard assessment would need to be conducted to assess what hazards are encountered due to the driver's occupational exposure. He stated that he would contact her to discuss her concerns further.

Next, Dr. Hickman spoke about emergency action plans. She thanked the departments that have updated their plans and have conducted training on the updates. She reminded the committee that all new hires are required to have the training within the first week of their employment. She further recommended that training is done periodically. She reminded the committee that sign-in sheets are required to document the training and must be provided to her.

The Chairwoman continued by speaking about the recent tornado warning that occurred in the County. She spoke about the proper way to respond to the warning. She thanked the departments who utilized the emergency action plan to properly have employees shelter in place. She asked Mr. DeWoody to speak about how the situation was handled at the County Administration building. Mr. DeWoody advised that the coordinator directed all employees to go to the designated area, where everyone remained until the warning had ceased. She reminded the committee that all emergency action plans should have instructions on what to do during tornado / hurricane warnings. She recommended that all departments go over that portion of the plan with all employees. Ms. Sauro advised that the department has instructions on what to do when employees are in the building but inquired about what to do when drivers are on the road and a warning is issued. Dr. Hickman asked Mr. Prince to comment. Mr. Prince provided some recommendations on what can be done. Dr. Hickman advised that she would work with the department to place language in their plan pertaining to what drivers should do.

Lastly, she congratulated everyone who participated in the wellness walks. She spoke about the support that is being received and the adjustments that have been made to ensure that all who wish to can participate.

V. Risk Management Consultant's Report

Ms. Violetti reviewed the claims experience graph, valued as of 5/31/2025, which illustrates the total number of workers' compensation claims for Cumberland County and Cumberland County Utilities Authority, with an exclusion of any pandemic claims.

She continued by reviewing the 2024 Inservco Insurance Services Stewardship report. Mr. Stokes commented on the improvement on the number of days to report a claim. Mr. DeWoody asked if the information provided in the report could be compared to another County that has a correctional facility. Mr. Stokes advised that he could put together a document. Mr. Prince spoke about the important items that need to be known about another County correctional facility to accurately compare both. The types of injuries sustained by correctional facility personnel were discussed. Mr. Stokes advised that there is nothing found in the report that concerned him.

Lastly, Ms. Violetti advised that a submission has been provided to J.A. Montgomery for the 2025 NJCE JIF reinsurer safety grant. The submission was from the County Public Works Department. The department requested funding for the installation of six cameras at the Bridgeton and Vineland fuel facility. The total cost for six cameras and corresponding accessories is \$46,900. The facility is utilized by both County employees are well as employees from other entities, including many municipalities. The cameras would provide full coverage of all pumps at both facilities. The installation of the cameras would mitigate risk by deterring criminal activity, monitoring compliance with operational procedures and will reduce liability claims.

VI. NJCEL Safety Director's Report

Mr. Prince spoke about safety training available on the www.NJCE.org website. He reminded the committee to include Dr. Hickman on all training requests. He highlighted some of the training courses available.

 - 4.) The amount of unpaid claims to be established.
 - a.) The general reserving philosophy is to set reserves based upon the probable total cost of the claim at the time of conclusion. Historically, on claims aged eighteen (18) months, the Insurance Commission expects the claims servicing company to set reserves at 85% accuracy. The Insurance Commission also establishes reserves recommended by the Insurance Commission's Actuary for claims that have been incurred but not yet reported so that the Insurance Commission has adequate reserves to pay all claims and allocated loss adjusted expense liability.
 - b.) Claims reserves are subject to regular review by the Insurance Commission's Executive Director/Administrator, Attorney, Board of Commissioners and claims servicing company. Reserves on large or unusual claims are also subject to review by the claims departments of the commercial insurance companies or reinsurance companies providing primary or excess coverages to the Insurance Commission either directly or through the NJC JIF.

- 5.) The method of assessing contributions to be paid by each member of the Insurance Commission.
 - a.) By November 15th of each year, the actuary computes the probable net cost for the upcoming Insurance Commission year by line of coverage and for each prior Insurance Commission year. The Actuary includes all budget items in these computations. The annual assessment of each participating member entity is it's pro rata share of the probable net cost of the upcoming Insurance Commission year for each line of coverage as computed by the Actuary.
 - b.) The calculation of pro rata shares is based on each member's experience modified manual premium for that line of coverage. The Insurance Commission's Governing Body also adopts a capping formula which limits the increase of any member's assessment from the preceding year to the Insurance Commission wide average increase plus a percentage selected by the Governing Body. The total amount of each member's annual assessment is certified by majority vote of the Insurance Commission's Governing Body at least one (1) month prior to the beginning of the next fiscal year.
 - c.) The Treasurer deposits each member's assessment into the appropriate accounts, including the administrative account, and the claim or loss retention trust Insurance Commission account by Insurance Commission year for each type of coverage in which the member participates.
 - d.) If a member entity becomes a member of the Insurance Commission or elects to participate in a line of coverage after the start of the Insurance Commission year, such participant's assessments and supplement assessments are reduced in proportion to that part of the year which had elapsed.
 - e.) The Insurance Commission's Governing Body may by majority vote levy upon the participating member entities additional assessments wherever needed or so ordered by the Commissioner of Insurance to supplement the Insurance Commission's claim, loss retention or administrative accounts to assure the payment of the Insurance Commission's obligations. All supplemental assessments are charged to the participating member entities by applicable Insurance Commission year, and shall be apportioned by the year's assessments for that line of coverage.
 - f.) Should any member fail or refuse to pay its assessments or supplemental assessments, or should the Insurance Commission fail to assess funds required to meet its obligations, the Chairman, or in

the event by his or her failure to do so, the custodian of the Insurance Commission's assets, shall notify the Commissioner of Insurance and the Director of Community Affairs. Past due assessments shall bear interest at the rate established annually by the Insurance Commission's Governing Body.

- 6.) <u>Procedures governing loss adjustment and legal expenses.</u>
 - a.) The Insurance Commission engages a claims service company to handle all claims. The performance of the claims adjusters is monitored and periodically audited by the Executive Director's office, the Insurance Commission Attorney, the NJC's attorney's office, as well as the claims department of the NJC's major excess insurers (i.e. Safety National, Munich, Berkley, Old Republic, Bowhead and Obsidian for liability reinsurance; Safety National Casualty Company for workers' compensation). Every three years, the NJC's internal auditors may conduct an audit.
 - b.) Each member entity is provided with a claims reporting procedure and appropriate forms.
 - c.) In order to control workers' compensation medical costs, the Insurance Commission has engaged a managed care organization (MCO) through the claims service company whose procedures are integrated into the Insurance Commission's claims process.
 - d.) To provide for quality defense and control costs, the Insurance Commission has established an approved defense attorney panel with firms which specialize in Title 59 matters. The performance of the defense attorneys is overseen by the Insurance Commission Attorney, as well as, the various firms which audit the claims adjusters.
- 7.) Coverage to be purchased from a commercial insurer, if any.

The Insurance Commission does not purchase commercial insurance.

8.) Reinsurance to be purchased.

The Insurance Commission does not purchase reinsurance.

- 9.) Procedures for the closure of Insurance Commission years, including the maintenance of all relevant accounting records.
 - a.) Not applicable at this time.

- 10.) <u>Assumptions and Methodology used for the calculation of appropriate reserves requirements to be established and administered in accordance with sound actuarial principles.</u>
 - a.) The general approach in estimating the loss reserves of the Insurance Commission is to project ultimate losses for each Insurance Commission year using paid and incurred loss data. Two traditional actuarial methodologies are used: the paid loss development method and the incurred loss development method. From the two different indications resulting from these methods the Insurance Commission Actuary chooses a "select" estimate of ultimate losses. Subtraction of the paid losses from the select ultimate losses yields the loss reserve liability or Insurance Commission funding requirement.
 - b.) The following is an overview of the two actuarial methods used to project the ultimate losses.
 - Paid Loss Development Method This method uses historical accident year paid loss patterns to project ultimate losses for each accident year. Because this method does not use case reserve data, estimates from it are not affected by changes in case reserving practices. However, the results of this method are sensitive to changes in the rate of which claims are settled and losses are paid, and may underestimate ultimate losses if provisions are not included for very large open claims.
 - Case Incurred Loss Development Method This method is similar to the paid loss development method except it uses historical case incurred loss patterns (paid plus case outstanding reserves) to estimate ultimate losses. Because the data used includes case reserve estimates, the results from this method may be affected by changes in case reserve adequacy.
- 11.) The maximum amount a certifying and approving officer may approve pursuant to N.J.A.C. 11:15-2.22.
 - \$15,000 for workers compensation claims
 - \$10,000 for liability claims
 - With the advance approval of the Insurance Commission Attorney or Executive Director, the certifying and approving officer may also pay hospital bills if waiting until after the next regularly scheduled Insurance Commission meeting would result in the loss of a discount on such bills.

When the certifying and approving officer utilizes this authority, a report shall be made to the Commissioners at their next meeting.
